

# Report of a Personal Data Breach at Phoenix Security

Phoenix Security takes Data protection very seriously, please report the event of a breach or suspect of a breach using the information below

The report should be made as soon as possible after discovery of a breach. If more time is needed to gather information, a partial report should be submitted, then updates can be sent as they become available.

Report should follow the rule of engagement described here:

<https://phoenix.security/breach-disclosure/>

| Who is reporting the breach? |  | Who discovered the breach? |  |
|------------------------------|--|----------------------------|--|
| Name:                        |  | Name                       |  |
| Organization:                |  | Organization               |  |
| Email:                       |  | Email                      |  |
| Telephone                    |  | Telephone                  |  |
| Date of Report               |  | Date of Discovery          |  |

| What kind of breach was it?                                                                       |
|---------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> Data was disclosed to an unauthorized person (Breach of Confidentiality) |
| <input type="checkbox"/> Data was accessed by an unauthorized person (Breach of Confidentiality)  |
| <input type="checkbox"/> Data was altered. (Breach of Integrity).                                 |
| <input type="checkbox"/> Data was lost. (Breach of Availability).                                 |
| <input type="checkbox"/> Data was destroyed. (Breach of Availability).                            |

| Describe in detail the nature of the security incident and data breach |
|------------------------------------------------------------------------|
|                                                                        |

**If confidentiality was breached, if possible identify the unauthorised persons.**  
*If they deliberately accessed the data, what do you believe their intentions to be?*

**What data was compromised?**  
*Describe the type of data you want to report*

**Which data subjects have been affected (optional)?**  
*Include any special characteristics of the subjects. For example, are any client, persons or vulnerable persons affected?*

**What are the possible consequences for the data subjects as a result of the breach (optional) ?**  
*Include an assessment of the severity and permanence of such consequences*

**What do you plan to do to mitigate the consequences of the breach?**

**What is the status of our mitigations?**

*Were they put into place? Did they succeed? What else is planned?*
